

Object name

Single family house in Heufeld

Germany

Object photo

Object description

The low energy house with passive house components in Heufeld (Bavaria) is built without a basement-

The building is a timber construction and all building materials are chosen under the aspect of their environmental compatibility.

A Compact Unit provides the heating with supply-air and also generates the hot water. The frost protection of the Compact Unit is realised with a brine-bearing subsoil heat exchanger.

For supporting the Compact Unit a wood fired oven with water connection is additionally built-in.

Fact sheet

Single family house in 83052 / Heufeld
Treated Floor Area 145 m²
Number of apartments 1
Completion date 2009

Energy standard [PHPP]

Heat requirement / year 26 kWh/m²a
Heat load 16 W/m²
Primary energy requ. 89 kWh/m²a
Air-tightness (n₅₀-value) 0,45 1/h
Building type Timber construction

U-value

Exterior wall 0,11 W/m²K
Roof 0,09 W/m²K
Basement floor / Floor slab 0,11 W/m²K
Windows / average 0,74 W/m²K

Specification ventilation system

Compact Unit with subsoil heat exchanger for frost protection

Heating installation

Compact Unit, wood oven

Construction costs --- Euro/m²

Building owner

private

Architect/Planner

Hubert Steinseiler
